## Programme Agenda

The University of Horticultural Sciences, Bagalkot (UHSB), Karnataka, is one of the most reputed institutes in the Horticulture sector operating in 24 districts of Karnataka with 9 constituent colleges and 12 research stations. It is imparting quality education, supported by the research of international standards. The technologies and knowledge are effectively disseminated through extension activities to the stakeholders. Further, to improve the quality of undergraduate education and faculty upscaling and inculcating entrepreneurial capabilities among the graduating students, the university has been endowed with the ICAR-NAHEP Institutional Development Plan (IDP) project, funded by the World Bank.

Alumni of any institute play crucial role in brand building of the institute in the longer run. After student graduates from the institute and enters in the professional world, perception of the people about particular institute depends upon such graduate student. There are many ways institute can build network of alumni and keep them engaged with institute to have mutual benefits like campus placement, internship opportunities support for education events, seminars and discussion and sharing career opportunities. Thus building meaningful relationships with students and alumni is more important for the strategic growth and advancement of higher education programs. One of the reason for the universities struggling to maintain strong relationships with alumni is because they're connecting to students/alumni aftermany years of graduation—which is too late.

The one of the objective of IDP project to create world class academic ambience invites a strong alumni network to build an institution of great rapport. Hence, to build an academically strong University of Horticultural Sciences, Bagalkot, this alumni meet is organized. I am highly thankful to all the alumni who have gathered here traveling from various places. Nearly 500 alumni are here.
